### Subchapter 8. Clean Fuels Program

#### **§ 2306. Identification of Affected Owner/Lessors Required to Equip Additional Retail Clean Fuel Outlets Each Year.**

For each year, at least fourteen months before the start of the year, the executive officer shall identify for each designated clean fuel the affected retail gasoline outlet owner/lessors who will be required to equip retail gasoline outlets or other retail outlets to dispense that fuel. An affected station owner/lessor is any person who is the owner/lessor of a number of retail gasoline outlets equal to or greater than the minimum ownership level (MOL) for the year, calculated as follows:

$$\text{Minimum Ownership Level (MOL)} = \frac{\text{Number of Non-Clean Fuel Retail Outlets}}{\text{Sum of the Numbers of Additional Retail Clean Fuel Outlets for All Designated Clean Fuels}}$$

Where: *Number of Non-Clean Fuel Retail Outlets* is calculated by subtracting the sum of the required retail clean fuel outlets determined in accordance with section 2304(a) for all designated clean fuels for the previous year, from the total number of retail gasoline outlets statewide estimated by the executive officer based on the reports submitted pursuant to section 2312 and other reasonably available relevant information.

Sum of the Numbers of Additional Retail Clean Fuel Outlets for All Designated Clean Fuels is the sum of the total additional number of clean fuel outlets calculated for the year for each designated clean fuel in accordance with section 2304(b).

The executive officer shall round the result of the calculation for minimum ownership level to the nearest integer.
